Po Schoultz's father called "City Hall," and spoke to Dep Major Staylor's assistant. The father said that his son was never told why he is on RID. Sgt Burnilla reached out to Po Schoultz who said he was never told why he is on RID.

I told SVA Australia that Dr Lamstein was away, so could not report in an exact conversation, but I read some notes which confirm she "gave feedback," and more. I tell that our policy is to make sure M&S know why ~~the~~ they are being placed in RIO (even if they may disagree). We also try to direct M&S to places they can get help, as Dr. Lamstein clearly did.

I told SJA that Dr. Lanstein would call in  
PO Schoolcraft as soon as she returns, <sup>and</sup> to answer my  
questions he may have. SJA Burnilla said that was  
fine - it ~~should~~ could wait for Dr. Lanstein's return.

Re: P.O. Adrian Schaeffer  
10/27/09 - FIFEMOS

I explained to Mos. that I called him in immediately upon my return from a 2 wk vacation. He is receiving treatment that his father made a complaint statement that I never told Mos. the reason why he is on R/P. Since we had discussed that in detail at his initial & subsequent visits, I empathetically discussed an uncertainty of how he may not have wanted to tell his father the reason why he was on R/P. Do note over that he has a clear understanding of why he is on R/P. I again explained in detail that he is on R/P b/c he had significant physical manifestations of asthma that were causing much discomfort & would benefit from treatment & further monitoring.

Mos. said he no longer has those physical symptoms now even though he is still facing the same asthma as before while on R/P. He is at present dead of PCT daily with complaints all day long - not able to sleep, has not only less asthmatic (in his opinion) or regular E/points.

I again reemphasized that I left & re-entered training so the next time he is faced with new increased asthma, he won't have a recurrence of the chest pain, headache, morning report standby, etc. that he had if and when he has to come to PES. He said he bought both books I recommended stated reading them, but not that helped since most he didn't know before. He bought the Burns book on kind of carrying & prepared the Ellis book. He ~~had~~ <sup>had</sup> bought both books to today's class & had bookmarked in them, ~~had~~ <sup>had</sup> a very poor understanding (so hasn't read much of them). He said he called a few people of generally b/c he took a class & one worked 400/hr. I told him I could help him find an Actor Playbill & to make sure they work with SBT for physicals etc of AST. He said he would call later & his provider & to make of his exact HMO plan so I can make sure the provider are in-network. Mos. expressed an apprehension of the asthma.

10/27/09 - T/C to Mos

I informed Mos that I found a number of psychologists in Forest Hills (his preferred location) who accept Actis Health & specialize in CBT, ART, & Schema Ther. He does not have a private fax machine so I offered to mail it to him, or also gave him the Actisbehavioralhealth.com website for further info, as well as links to self-assessment tools. \_\_\_\_\_ C Dorothy Prys.
